

Podcast Transcript for December 7, 2025

Friends, this is a Clock Prophecy Alert for December 7, 2025.

The continuing escalation in the war of the beast against the Lamb is only a preview of what's to come after the 144,000 Hebrew princes are removed from the earth, and then return shortly after to complete the take over the nations.

There are so many things I look at mathematically on the Clock that it's impossible for me to share all of them, but let's look at the center of Revelation, or verse 202, in which Satan and his angels are cast out of heaven in Revelation 12:8.

This passage in the AM layer of the Clock fell in 2014, and we observed the rampage of ISIS across the Middle East at that time.

We want to notice that this event is just three verses after the birth of the Man-Child in verse two, an event also vectored to 2014.

Revelation 12:1-2 gave us a key monograph in my book showing the real-time convergence of the first blood moon in April of 2014 and the arrival of this passage on the Clock the same morning.

I go back to this often because it marks the birth of the Man-child in the same year we believe it literally occurred, while the catching up portion did not occur in the PM layer as I had hoped, but which now appears imminent.

I see the head wound event taking place just before the Man-child's catching up because that was the sequence shown to me in the vision, but it may be that the Man-child's departure takes place partly in front of the head wound before completing at the third Trumpet.

As you know, the year 2027 has been a central theme of this end time message due to the Man-child's birth in 2014 and his age of maturity when he reaches 13 two years from now.

While it remains a possibility that we won't see the start of early harvest until 2027, there are many measurements on the Clock pointing to 2026, not the least of which is the arrival of 6-6-6 on the Clock just weeks from now.

Part of the vision that I had in 2010 was about the one thousand two hundred and sixty days that began where 2:58 fell on the Clock.

As you know, 2:58 arrived in January of 2023, and we did not reach Critical Mass that year, nor did William reach 41 years of age until the Summer Solstice, which is why our Watch was pushed another year out.

It was at this point that my search for the two hours of delay became more critical, even though we had discussed this issue in earlier messages.

The question was whether a period of 521 days should be counted from the placement of the head wound in Revelation 13, or from some other passage of scripture or some future event yet to occur.

We had talked about the 5-0-6 key code in late 2021 when it identified the placement of the head wound in a reverse count of twelve-hundred and sixty days from the end date on the Clock.

In other words, counting 506 days from October 15, 2021 took us to the head wound event in Revelation 13:3 exactly where the Daniel Key marked its arrival in the Spring of 2023.

Now it appears that 5-0-6 may be playing a final role to mark the end of the two hour delay, whereby adding two hours to 5:06 on the Clock puts us at exactly Clock time 6-6-6 in mid-January.

Let's talk about the object known as 3i/Atlas, which will be at its closest point to the Earth on December the 19th.

For many reasons, I am becoming convinced this will become the sign of the Son of Man in heaven!

Measurements on the Clock pointing to the month of December may have to do with the significance of this comet and its relationship to the 144,000 Hebrew princes, who are soon to make their departure!

In closing, a year-end Special Update may be put out during Christmas week, or possibly sooner, otherwise we may conclude the year with a final audio message.

In light of current events, I encourage you to stay alert as we move through this high *Watch* period!

God bless as you continue to hear what the Spirit is saying to the churches:

"Behold, I come quickly!"
