

SPECIAL UPDATE

JANUARY 3, 2026

**THE YEAR OF HARVEST
(PART 1)**

Friends, my latest work with the Clock shows the main events of Critical Mass occurring in the first half of 2026.

This could begin as early as January 8 where the 6-6-6 window opens just days from now, or things may not get underway until late Winter.

It remains a possibility we may not reach the start of harvest until the Man-child reaches maturity in April of 2027, for reasons I will go over in an upcoming Audio Alert.

Daniel Key measurements cannot give us certainty about Clock dates, but in this message I will share why a major shift into the apocalypse is imminent.

When this ministry began, all I had was the Daniel Key and the vision I received in 2010 to help me understand where we were on the timeline.

Later on, I received the 7 Thunders, which not only identified the first and second beast, but also the placement of numerous key codes in the PM layer where the Daniel Key continued to operate.

Having gone past the half hour of silence last March at the end of the PM layer, we came to the 12 day war with Iran last June that I believe was the first Trumpet of the 7th Seal.

While a more dramatic conclusion to the first Trumpet may be imminent, both the head wound to the first beast and the 2nd Trumpet will shortly mark the start of early harvest.

In past years, the AM and PM layers of the Clock have shown the divided fulfillment of key prophetic events like the birth of the Man-child and his catching up, both events recorded in the same passage.

Now a third element I refer to as the Signal Code, linked to the mysterious cosmic visitor 3I/Atlas, is a number that allows me to triangulate passages in a way I was not able to do before.

I believe this object is something more than a comet, and while I don't know exactly what it is, the number 41573 is without question a key code on the Clock that shows we are almost out of time!

Before I share some remarkable metrics using the Signal Code, keep in mind that 3I/Atlas is now on its way to Jupiter with an arrival date of March 16.

We will explore the March date a bit later on, but for now let's review how the biblical Hebrew and Greek lexicons are linked to the Clock.

In the Strongs Concordance of biblical Hebrew, which is recognized as one of the most comprehensive sources for that lexicon, there are 8,674 words.

The final word of this lexicon is a proper noun referring to a Syrian governor who was opposed to the rebuilding of Jerusalem, a fitting end point to foreshadow the future Antichrist who will show similar contempt for Zion.

Just two words before this at index position 8672, is a Hebrew word that we want to express in Clock time using the format 8.672.

The Clock reads this as 8 hours plus one additional hour plus 7 minutes plus .002 minutes, a conversion from base ten to base 60.

We saw earlier that 6.66 on the Clock converts to the 7th hour plus six minutes, or 7:06, to reflect that point 6 is a whole hour, after which any remainder is equal to minutes and parts of a minute.

As for the Hebrew word at 8762, the Clock converts this to 9:0762.

Now let's look up the meaning of this Hebrew word in Strongs, where we find that it means the very hour this number represents on the Clock!

I believe this demonstrates that the timeline comes to an end at some point during the ninth hour, which is fitting since both Clock layers began their prophetic watch periods at 10 O'Clock.

Remember that we have cycled through two 8 hour layers plus the four hour black ring separating them before completing the PM layer last March, meaning we are just 2 hours and 55 minutes (760 days) from completing a 24 hour day!

We naturally want to know the date associated with the final word of the biblical Hebrew at 8,674 which converts to Clock time 9:074.

Incredibly, we find that it vectors to the date of William's 45th birthday on June 21, 2027!

I know the math can be daunting, but the simplest approach is to add the extra time to 6 PM where the PM layer ended on March 28, 2025, as shown below:

Clock time 6 PM = 03.28.25
 Clock time 9.074 – 6.00 = 3.074 hours
 3 x 260.75 days = 782.25 days
 7.4 minutes x 4.3458 days = 32.159175 days
 03.28.25 + 782.25 + 32.159175 = 06.21.27 / UTC+9

This vector is relative to US PDT (LA) time which is UTC-7, meaning the 21st arrives in places like Japan and South Korea (UTC+9) before it arrives in London or the Americas.

Keep in mind that any calendar date is partially on the day before or after depending on one's time zone.

We now want to know where the ninth hour ends, and that would be after midnight on February 4, 2028, which may mean that William's rule with 10 Kings for one hour will begin 261 days earlier in May of 2027!

Now Let's use the Signal Code to see how it links to 3I/Atlas to affirm that 2026 is the likely year for the start of early harvest.

The Man-child's catching up is at 2:45 on the Clock (Rev 12:5) and we are adding the Signal Code to carry us forward in time:

$2:456 + 4.1573 = 6.6133 = 7:0133$

This Clock time vectors to the date of December 19 just two weeks ago, which was the day that 3I/Atlas reached its point of perigee with the Earth, meaning its closest approach to our planet before continuing on its journey to Jupiter.

I believe the comet is divinely ordered to mark the imminence of the Man-child's departure in the Spring, and it may be involved further in that remarkable event once it gets underway!

Another measurement uses Revelation 13:18 which is at verse vector 229, a number we associate with 666 because it is the only passage in the Bible referring to 666.

In addition, it is Barack Obama's 666-adjusted birth metric on November 26, 1962 in Microsoft's global date reference system, or the number 22,976.

Verse vector 228.5 is at the center of Revelation 13:18, exactly dividing this verse, and falling at 3:28 (rounded) on the Clock, which vectors to June 6, 2023 in the PM layer.

Remember that in 2023 we noted William's birth metric fell a few verses later at the end of Revelation 14:2 to reveal a link between his birth metric and the 144,000, as revealed in The 7 Thunders two years earlier.

Now we want to add the Signal Code to the center-point of Revelation 13:18 in order to bring us forward in time:

$$228.5 = 3:279 + 4.1573 = 06.21.26 \text{ (Rev 13:18)}$$

As you can see, the result is exactly Prince William's birthday six months from now on June 21, 2026!

I have probably done a thousand of these measurements by now using every conceivable Clock vector in combination with the Signal Code, and the resulting vectors highlight 2026 as the year we have been waiting for.

It is difficult to say what comes next in terms of Clock Prophecy content should things escalate quickly from here, so there may be limited opportunity for new updates.

There are other vector dates I want to talk about and that will be my objective in the upcoming Audio Alert, so stay tuned for that.

I will always do my best to keep in touch with my readers, meanwhile God bless as you continue to hear what the Spirit is saying to the churches:

“Behold, I come quickly!” (Rev 3:11)

Peter John Brandal
