

Podcast Transcript for August 8, 2026

Friends, this is a Clock Prophecy Alert for August 8, 2026.

In the PDF for this message, you will see a table with various date ranges referring to the remainder of the year, all based on the latest Clock measurements.

Each time we pass a fulfillment window based on earlier measurements, I am prompted to look ahead on the Clock as we come to the end of a 24 hour prophetic day.

As you know, 24 hours of prophetic time on the Clock will take us to early February of 2028, and it is my belief that all the saints will have been gathered by that point in time.

You may be aware of a planetary alignment involving 6 planets on the 29th of AV, a Jewish memorial marking the end of the 40 days Moses spent on Mt Sinai, and which this year falls on August 12th.

The first day of Elul is August 13th, on which a 40 day period of preparation begins for the arrival of Rosh Hashanah, which is the first day of the Feast of Trumpets, ending at Yom Kippur.

As Christians, we would be wise to complete any unfulfilled commitments, for example those who have not been baptized in water, or those who have never taken the Lord's Supper, or those who do not pray the Lord's Prayer daily.

Also on August the 12th is a total solar eclipse, with a period of totality lasting up to 2 minutes and 18 seconds depending on your location.

It's interesting that 2 minutes and 18 seconds on the Clock is exactly ten days, which makes me think of the ten days in Revelation 2:10, which says there will be ten days of tribulation to endure.

I interpret this ten days of prophetic time to equal a ten year period, so I subtracted ten years from the Clock end date in early 2028, resulting in the date of February 4, 2018.

The Clock time that vectors to this date in 2018 is almost exactly 8 O'Clock, which is also where we will be on August 30 just weeks from now!

What could this mean? I would say that it means our ten years of tribulation began in early 2018 during the black ring period after the end of the AM layer on the Clock!

That would mean we only have 18 months of that ten year period left to go, or even less for those in the earliest of the four groups of harvest!

Before I go into a list of dates associated with the events of Critical Mass, I want to point out that yet another comet, this one named 220P/McNaught, is passing through our solar system right now.

This comet was discovered 22 years ago and has an orbital period of 5 and a half years. It is primarily affected by Jupiter's gravity as it travels in a wide arc around the Sun.

On June the first, this comet experienced an unexpected, massive outburst causing it to grow more than 8,000 times brighter, then on August 5th it flared yet again, reaching magnitude 7, which is 25,000 time brighter than it was originally!

Let's look at a few other remarkable metrics about the comet showing how it is linked to the Man-child's birth day in 2027.

First, the comet's east-west position in the sky, referred to as its Right Ascension, is currently at 2 hrs and 41 minutes.

To keep this simple, that just means it has traveled about 7 inches at arm's length from a particular reference point in the sky to another, moving east to west.

The 2 hour and 41 minute value is important because any number between 240 and 245 is a birth metric for the Man-child since verse 2 of Revelation 12 opens at 2:40 on the Clock.

Revelation 12:2 says the woman is ready to be delivered, but she doesn't actually give birth until verse 5, which on the Clock comes to a close at 2:45 and 36 seconds.

The comet will be at a Right Ascension of 2 hours and 45 minutes just two days from now on August the tenth!

We know the Man-child was born literally in April of 2014, so this isn't about his physical birth, which means it must relate to his spiritual rebirth before being caught up after the 2nd Trumpet!

Another remarkable metric for the comet is that as of today, it is 1.33 Astronomical Units from the Earth, meaning about 123 million miles.

As you know, Revelation 13:3 points to a critical event in that passage, one that will affirm the identity of the first beast before he is restored to power.

Incredibly, comet 220P is now approaching the Earth and will be at its closest to us on October 12, 2026, while remaining at a safe distance of about 90 million miles.

All these measurements underscore how both this comet and Comet 3I/Atlas have provided an early stage of fulfillment for the Sign of the Son of Man in heaven, even before we reach its most dramatic manifestation at the start of early harvest!

Now let's talk about the focus dates, all of which fall between now and the end of the year.

Because the Clock doesn't give us certainty about dates of fulfillment, I haven't added verse references in the list, because we already know the events we are watching for, and those things could occur inside or outside the date windows shown.

I do want to mention the date of November 3rd simply because it happens to be the date of the US midterms, but that isn't how it came to be part of the list.

If November 3rd turns out to be of significance, it may have nothing to do with the elections, or it may pertain to them in a way that isn't yet apparent.

I will be surprised if August is not an explosive month, whether literally or figuratively, and while that may be just as true for other dates on the list, December appears to be especially crucial due to its link to the number 144, and may also bring us to the 2nd Trumpet of Revelation!

Stay tuned as you continue to hear what the Spirit is saying to the churches:

"Behold, I come quickly!"

Peter John Brandal
